Proposal

Dear Colleagues,

This Special Issue of the Journal of Advances in Applied and Computational Mathematics focuses on the latest achievements of research done in the area of qualitative theory of differential equations, understood in the broad sense. It covers behaviour of the solutions for ordinary, delay, difference, functional, impulsive, fractional and dynamic equations, as well as their applications in science and technology.

In this Special Issue, we invite and welcome review, expository and original research articles of high-quality from leading experts and researchers actively working in the field.

We look forward to receiving your valuable research papers.

Prof. George Chatzarakis

**Deadline for manuscript
submissions: June 30, 2021.**
